Broker Remarks

Designed by renowned naval architect Michael Peters, the MPYD patented, high-performance "Stepped-Vee Ventilated Tunnel" (SVVT) hull creates the lowest drag coefficient of any mono hull in the world. This means increased speed, better fuel economy than conventional stepped hulls, and an all-around better ride.

This Invincible 36' Open Fisherman is equipped with triple outboards with top speeds in excess of 65 Mph. The 475 Gallon fuel capacity will get you to the farthest fishing grounds and back with speed, comfort and style. Don't miss the chance to own a 2016 36' Invincible without the wait time or hassle. The boat is in mint condition with low engine hours and ready to fish or cruise.
