## Description

---

**\$10,000 Price Reduction! Now including the trailer in the sale of the vessel!**

Designed by renowned naval architect Michael Peters, the MPYD patented, high-performance "Stepped-Vee Ventilated Tunnel" (SVVT) hull creates the lowest drag coefficient of any mono hull in the world. This means increased speed, better fuel economy than conventional stepped hulls, and an all-around better ride.

This Invincible 33' Open Fisherman is equipped with twin outboards. With top speeds in excess of 60 Mph, the 320 Gallon fuel capacity will get you to the farthest fishing grounds and back with speed, comfort, and style. It was beautifully fit and finished with state-of-the-art construction, and the implementation of the highest quality materials available. This 2013 33' has been meticulously maintained with low hours. She is ready to catch fish or cruise in style.
